Retrospective Development Factors

## DELAWARE RETROSPECTIVE DEVELOPMENT FACTORS \*

Retrospective development factors for first, second and third adjustments are calculated below. They are intended for use in retrospective plans with no loss limitation and applicable to the expected loss portion of premium.

First Adjustment	RDF =	0.6537
Second Adjustment	RDF =	0.5160
Third Adjustment	RDF =	0.4117

For those companies using retrospective development factors with loss limitations, the following formula may be used.

$$\text{RDF(LIM)} = (1.0 - \text{ELF}) \times \text{RDF}$$

RDF(LIM) = Retrospective Development Factors at limited basis  
ELF = Excess Loss (Pure Premium) Factors exclusive of allocated loss adjustment expenses for given Hazard Group and Loss Limitation  
RDF = Retrospective Development Factors without Loss Limitation

For Example:

\$25,000 limit Hazard Group C ELF =		0.665
First Adjustment RDF =	$(1 - 0.665) \times 0.6537 =$	0.2190

\* The use of retrospective development factors is optional.
