DELAWARE COMPENSATION RATING BUREAU, INC.

Evaluation of House Bill 373 of 2014

Introduction

§2322B of House Bill 373 of 2014 (HB373) set forth procedures and requirements applicable to the health care payment system for workers compensation claims, and particularly impacting the fee schedule for all Delaware workers compensation funded procedures, treatments and services. Among those procedures and requirements are the following notable elements:

$\S 2322B(3)(a)$:

The Workers' Compensation Oversight Panel (WCOP) was required to establish a fee schedule(s) based on the Resource Based Relative Value Scale ("RBRVS"), Medical Severity Diagnosis Related Group (MS-DRG), Ambulatory Payment Classification (APC), or equivalent scale used by the Centers for Medicare and Medicaid Services.

The fee schedule(s) are required to result in a reduction of 20% in aggregate workers compensation medical expenses by the year beginning January 31, 2015, an additional reduction of 5% of 2014 expenses by the year beginning January 31, 2016 and an additional reduction of 8% of 2014 expenses by the year beginning January 31, 2017.

\$2322B(3)(b):

By January 31, 2017, no individual procedure in Delaware paid for through the workers compensation system shall be reimbursed at a rate greater than 200% of that reimbursed by the federal Medicare system, provided that radiology services may be reimbursed at up to 250% of the federal Medicare reimbursement and surgery services may be reimbursed at up to 300% of the federal Medicare reimbursement.

Section 3:

The advisory organization designated by the Department of Insurance pursuant to Title 18, Section 2607 of the Delaware Code (DCRB) was required, within 90 days of enactment of HB373, to file for approval by the Insurance Commissioner prospective loss costs that explicitly and individually accounted for the impact of any statutory changes in HB373.

Note: HB373 was signed into law on July 15, 2014. Accordingly, 90 days after enactment of HB373 was October 13, 2014.

Consistent with the evaluations of HB373 in the DCRB's December 1, 2014 and December 1, 2015 filings, the DCRB has elected to again apply the full level of savings called for in HB373 to the development of the December 1, 2016 residual market rate and voluntary market loss cost change. When Medical Data Call information pertaining to services provided subject to the new fee schedules has been collected and compiled for a sufficient period of time, the DCRB would be able to credibly measure the changes in expenditures occurring after the implementation of the new fee schedules. If such a review suggests that savings mandated under the law have not been accomplished, the DCRB reserves its right to submit, at any time following the completion of that review, a filing of prospective loss costs and residual market rates consistent with the DCRB's evaluation of the effects of HB373.

Sheet 2 of Exhibit 35 calculates savings factors by payment year for a forty year medical payout pattern attributable to the intended effects of the legislation. The expected annual savings from 2014 medical expenses are reflected in the first, second and finally third year of the payout. For the second and third years of the payout pattern, the required reductions in medical expenses pre-empt what would otherwise have been inflationary adjustments to medical fees and payments based on the CPI-U index. This overlap of provisions amplifies the otherwise attainable savings for this legislation. For 2015, the first year under the mandated reductions, the actual CPI-U value (0.1%) replaced the projected value from the previous analysis (2.0%). This caused a slight reduction in the savings factors over the forty year projection.

On Sheet 1 of Exhibit 35, the savings factors from Sheet 2 are applied to the DCRB's selected medical payout pattern. The resulting cumulative payments (\$682,591) are compared to the unadjusted payout of \$1,000,000, deriving the overall HB373 potential savings factor of 31.74 percent.
