

DELAWARE COMPENSATION RATING BUREAU, INC.

Temporary Staffing Rates

The methodology to determine workers compensation rates for temporary staffing risks calculates factors that are applied to direct employment rates by class in this filing. Those factors represent the temporary staffing pure premium compared to the direct employment pure premium for each class.

Note that the rates reflect rating values calculated prior to being adjusted to include certain surcharges that are included in approved and published rates (“pre-surcharge basis”). Those surcharges include offsets for the net credits offered for participation in the Merit Rating Plan, the Workplace Safety Program and the Construction Classification Premium Adjustment Program.

In this approach, the DCRB classes are mapped to one of five industry groups consistent with those used by the National Council on Compensation Insurance, Inc. (NCCI). In this filing, they are considered the five DCRB “sub-industry groups”. The classes are mapped into one of five industry groups (Manufacturing, Contracting, Office & Clerical, Goods & Services, and Miscellaneous) based on the DCRB to NCCI class mapping.

Exhibit 1 shows Policy Years 2016-2020 payrolls (in \$000) for each of the five DCRB sub-industry groups. Some payroll data used to calculate temporary staffing loss costs represents the actual amounts of temporary staffing payroll reported to the DCRB. For other payroll data, a number of temporary staffing classes have been assigned temporary staffing risks for two or more direct employment classes. That is, actual temporary staffing payroll amounts associated with each of those direct employment classes are not available. Therefore, a calculation of adjusted temporary staffing payroll amounts attributable to each direct employment class is performed. The adjusted temporary staffing payroll associated with each direct employment class is calculated by multiplying the temporary staffing class payroll by the ratio of the direct employment class payroll to the total statewide payroll for all direct employment classes contributing to that temporary staffing class. Similar calculations were performed for each such temporary staffing class and their associated direct employment classifications.

Exhibit 2 shows the calculation of indicated pure premium differentials for the temporary staffing risks relative to the direct employment risks. These differentials are calculated by sub-industry group, and in total, separately for Serious, Non-Serious and Medical Only. Within each sub-industry group, weights by class were calculated based on Policy Years 2016-2020 temporary staffing payroll and applied against both the Temporary Staffing indicated pure premium as well as the Direct Employment indicated pure premium to determine the indicated pure premium differentials for each sub-industry group and in total.

The actual indicated pure premium used in the differential calculations for both temporary staffing risks and direct employment risks is taken from the Class Book.

Exhibit 3 calculates credibility-weighted pure premium differentials of temporary staffing pure premiums to direct employment pure premiums, by sub-industry group and in total, for Serious, Non-Serious and Medical Only.

For the total of all sub-industry groups, Delaware credibility is determined as a function of total payroll using the payroll credibility table, which can be found in the Exhibit 28, Other Supporting Classification Exhibits. The credibility is applied to the total indicated pure premium differentials from Exhibit 2. The complement of credibility is applied to a weighted average of the Pennsylvania credibility-weighted indicated pure premium differentials by sub-industry group using weights calculated using the payroll by sub-industry group in Exhibit 1. The Pennsylvania differentials were taken from Exhibit 31 in the approved PCRB Filing No. C-380 (2023 Pennsylvania Filing).

For each of the sub-industry groups, a three-way credibility weighting is used. First, Delaware credibility is determined as a function of Delaware sub-industry group payroll using the payroll credibility table. That credibility is applied to the sub-industry group indicated pure premium differentials from Exhibit 2. Second, the indicated Pennsylvania sub-industry group differentials and their credibility are taken from Exhibit 31 in the 2023 Pennsylvania Filing. Third, the complement of credibility is applied to the credibility-weighted differentials calculated for the total of all sub-industry groups described in the prior paragraph. If the total of the Delaware and Pennsylvania credibilities is greater than or equal to 1.00, then only a two-way weighting is used (i.e., the differentials for the total of all sub-industry groups is not used).

Exhibit 4 determines the proposed temporary staffing rates by class. For each class, an indicated December 1, 2023 temporary staffing rate is calculated (column (14)) by multiplying the proposed December 1, 2023 direct employment rate by the total proposed temporary staffing pure premium divided by the total December 1, 2023 direct employment pure premium. If a class's total proposed temporary staffing pure premium and December 1, 2023 direct employment pure premium are each zero, then the associated sub-industry group's temporary staffing and direct employment pure premiums are used to calculate an appropriate factor.

The total proposed temporary staffing pure premium is the sum of the Serious, Non-Serious and Medical Only temporary staffing pure premiums. The three temporary staffing pure premiums are calculated by multiplying the December 1, 2023 Serious, Non-Serious and Medical Only direct employment pure premiums by the associated credibility-weighted differentials (calculated in Exhibit 3) of temporary staffing pure premium to direct employment pure premium. The proposed temporary staffing rates by class (column (16)) are determined by applying primary and secondary capping to the indicated temporary staffing rates in column (14).

Exhibit 5 is a summary of the temporary staffing rates by class. The pre-surge temporary staffing rates approved effective December 1, 2022, the pre-surge rates proposed effective December 1, 2023, and the proposed rate change, are shown. Also shown are the proposed post-surge temporary staffing rates by class. This exhibit is ordered by the December 1, 2020 temporary staffing code and direct employment code within the temporary staffing code. Most of the values shown in this exhibit were taken from Exhibit 4.
