Maryland
New Jersey
Pennsylvania
Virginia
West Virginia

Delaware Compensation Rating Bureau, Inc.

Comparison of Rates: Delaware to Other Northeastern States Delaware December 1, 2017 Rating Values

Discussion of workers compensation systems often includes claims or assertions regarding the relative premium costs for this line of insurance in various state jurisdictions. The Delaware Compensation Rating Bureau, Inc. (DCRB) is mindful that true premium costs for workers compensation insurance in different states are the result of many variables not generally susceptible to simple or generalized analysis. Especially important variables of this type include differences in classification plans approved in different states and competitive pricing differentials applied by insurance carriers in each jurisdiction. As a means of informing various parties interested in, subject to and/or participating in the Delaware workers compensation system regarding comparative system costs, the DCRB has previously produced studies which compared approved rates in several selected northeastern states to those of Delaware.

The DCRB has updated its prior study, which reflected rating values effective December 1, 2016, to recognize the revised residual market rates and voluntary market loss costs that were adopted in Delaware effective December 1, 2017. The results of that update are presented and discussed in this report.

Workers compensation insurance prices are commonly established within the context of statutory and administrative systems, which provide substantial flexibility and diversity to participants in the marketplace. In Delaware, one aspect of this flexibility is that significant numbers of insurers have historically elected not to adopt, or have adopted on a deferred basis, revised DCRB loss costs once approved by the Department of Insurance. Thus, the reader should be aware that some carriers, and potentially many carriers, may either not have completed their individual evaluation of those recently revised rating values and market conditions in order to adjust their own prices if, and to the extent, they may ultimately find them appropriate, or may have elected not to adopt the most recent DCRB loss costs.

In order to prepare this report, the DCRB has used the prevailing loss cost multipliers for each Delaware insurer as of April 1, 2018 together with the approved voluntary market loss costs in effect that same date. Further, the DCRB has verified that the carriers used to establish the “low” and “high” Delaware rates used in this study have adopted DCRB loss costs at least for their February 1, 2018 pricing. In some cases, however, carriers had not, in fact, adopted the approved DCRB December 1, 2017 loss costs as of the date of this report. Individual carriers currently so positioned may or may not adopt the most recently approved DCRB loss costs. Further, such carriers may revise their loss cost multipliers to some extent if, and when, they do elect to make such an adoption. As a consequence, the DCRB views the indications of this specific analysis as subject to ongoing change as market conditions and competitive circumstances evolve.

OVERVIEW OF STUDY RESULTS

- Delaware’s lowest approved rates for the classifications studied tended to be lower than the lowest rates for New Jersey (except for manufacturing classes) and tended to be higher than the lowest rates in Maryland, Pennsylvania, Virginia and West Virginia. Delaware’s highest rates tended to be lower than that of Maryland and tended to be higher than that of New Jersey (except for manufacturing classes), Pennsylvania, Virginia and West Virginia.

- In addition to the rating values shown in Exhibits 1 and 3, the final costs to policyholders may be significantly influenced by various assessments and/or surcharges that are applicable to premiums rather than rates. The following list shows additional costs that apply to premiums rather than rates for the states included in this study.

Delaware – None

Pennsylvania – Employer Assessment Factor 2.17%

Maryland – Premium Tax 2.0%, Subsequent Injury Fund 6.5%, Uninsured Employers Fund 2.0% and Workers Compensation Commission Tax 0.02%

New Jersey – Plan Premium Adjustment Program (assigned risk) minimum surcharge 20%, Second Injury Fund 5.15% and Uninsured Employers Fund 0.12%

West Virginia – Regulatory Surcharge 5.0%, Premium Tax 4.0% (currently waived for workers compensation) and Deficit Reduction Surcharge 9.0% (terminated effective January 1, 2019)

Virginia – None

- This study was limited by design to a comparison of approved carrier rates in the selected jurisdictions. Such rates exclude potential effects of a broad variety of special rating programs which may be available in some jurisdictions. Thus, this study is directed at the benchmark tabular rates used by insurers as a starting point in determining final premiums but has not analyzed the complex series of possible additional steps which may actually apply in determining each insured's policy premium. As examples of such additional factors, Delaware employers may qualify for some or all of the following special pricing programs:
 - Workplace Safety Program credits premised upon physical inspection of workplace conditions and safety measures in effect in the employer's business.
 - Construction Classification Premium Adjustment Program credits, which recognize effects of significant differences in wage levels between employers on workers compensation insurance premiums.
 - Schedule Rating credits or debits applied based on an individual insurer's assessment of features of an employer's business, which may differ from the usual circumstances expected in a given business enterprise.
 - Retrospective rating plans, which effectively rely on the insured's own loss experience in determining final insurance prices.
 - Deductible coverage, which allows employers to reduce their workers compensation insurance premiums in return for accepting responsibility for initial payments on claims which may occur for their employees.

- Each jurisdiction studied showed substantial ranges of approved rates within many given Delaware classifications. These ranges of approved rates are attributable, in part, to differences in carrier pricing initiatives and values, such as deviations or loss cost multipliers, and/or to differences in the structure of approved classifications, which cause parts of multiple different classifications in some states to be equivalent to parts of a single common classification in Delaware. Competitive differences in carrier pricing programs are applicable in deriving comparisons of Delaware rates to those of Maryland, Pennsylvania and Virginia and, in fact, produce very significant ranges of carrier rates even within Delaware itself for any given classification. Differences in classification plans apply in the comparisons with all states except Pennsylvania, which uses a classification system identical to that of Delaware for the classifications included in this study.
- While rate comparisons often include statements to the effect that “state X rates are “blank” percent higher (or lower) than those of state Y”, this study did not produce single factors for comparison of rates between states. Actually deriving such point estimates would require a significant amount of detail not generally available for analysis. To accurately establish rate differences in this fashion would require separate exposure data, within a state, consistent with the approved classification plan(s) of any other state(s) being included for comparison, and separately reported for each carrier using different rate levels (i.e., rate deviations or loss cost multipliers). Without such information, the proper weights cannot be determined for purposes of computing average rates in each state, and without benefit of these appropriate weights, averages or other similar statistics taken from different states must be viewed with caution.

STRUCTURE OF THE STUDY

Because the DCRB wanted to be able to comprehensively and correctly identify and account for differences in classification plans in this study, our analysis was limited to certain selected Delaware classifications. In determining which classifications to include in its annual report, the DCRB selected ten classifications from each of the three traditional industry groups commonly used in workers compensation pricing analysis: Manufacturing, Contracting and Other Industries. The classifications so selected were the largest Delaware classifications in each industry group as measured by expected losses, a statistic derived by multiplying recent exposures (generally payrolls) by the currently-approved DCRB loss cost values by classification. Based on the most recent available data, the 30 classifications included in this analysis account for over 43 percent of total Delaware expected losses and over 57 percent of total Delaware payrolls.

In order to compare Delaware rates to any other jurisdiction(s), a cross-reference between the classification plans used in Delaware and the comparison state(s) was needed. Development of such a cross-reference involved a thorough review of classification manuals provided by each jurisdiction included in this comparison. Cross-references were developed for the following states: Maryland, New Jersey, Pennsylvania, Virginia and West Virginia, states located in close geographic proximity to Delaware. As was the case in preparing previous studies, a draft of this study has been provided to each contributing jurisdiction for review and comment as a means of verifying the accuracy of information in this study.

Exhibit 1 presents the ranges of approved rates by state in any classification(s) part or all of which correspond to the indicated Delaware classifications studied. Where a state has more than one classification applicable to part(s) of a given Delaware classification, all such classifications are listed in numerical order on successive lines of the exhibit within the Delaware code of interest.

While some comparisons can be made on a “one-for-one” basis, it can be readily seen that review of many classifications requires recognition of multiple classifications in other jurisdictions. In an extreme case, Maryland, Virginia and West Virginia have nine classifications as compared to Delaware classification code 454, with some component(s) in common with a single Delaware classification.

In reviewing Exhibit 1, care must be taken to recognize the purpose and inherent limitations on the information as presented. Classifications shown for each state have been grouped within the pertinent Delaware classifications. The classifications shown for states other than Delaware have NOT necessarily been aligned to allow line-by-line comparisons of classifications and rates between those other states independent of Delaware. For example, while code 4717 is applicable to part of the Delaware code 104 in Maryland and code 2150 is applicable to part of Delaware code 104 in New Jersey, code 4717 in Maryland is not identical to code 2150 in New Jersey.

Exhibit 2 provides general definitions of each code number presented on Exhibit 1 by state, for purposes of clarification and understanding of the various elements of this study.

Delaware, Maryland, Pennsylvania, Virginia and West Virginia all have workers compensation pricing laws which require insurance carriers to establish independent loss cost multipliers or other similar parameters in order to derive their own approved rate schedules. Thus, for each of these states, a “low” and a “high” rate were derived in each classification. These rates reflect the extreme range of approved carrier rating values in each state as provided to the DCRB. While the DCRB cannot determine the extent to which carriers with these extreme values have written business in each of the classifications studied, the ranges shown do reflect the potential variation of prices in each jurisdiction owing to competitive factors. The bases for the ranges, as shown, are set forth briefly below:

Delaware: Loss Cost Multipliers Approved Range from 0.919 to 2.653
Approved Loss Costs Effective December 1, 2017

Maryland: Loss Cost Multipliers Approved Range from 0.882 to 3.503
Approved Loss Costs Effective January 1, 2018
Note: For Maryland, the rating values for the Chesapeake Employers’ Insurance Company were not available for this study.

Pennsylvania: Loss Cost Multipliers Approved Range from 0.900 to 3.251
Approved Loss Costs Effective April 1, 2018

Virginia: Loss Cost Multipliers Approved Range from 1.001 to 2.399
Approved Loss Costs Effective April 1, 2018

West Virginia: Loss Cost Multipliers Approved Range from 0.750 to 2.500
Approved Loss Costs Effective November 1, 2017

As of January 1, 2018, New Jersey does not allow carriers to deviate from the approved New Jersey Bureau rates in the voluntary market. Thus, there is no variation in price from carrier to carrier. Thus, the only variations in approved rates within a given Delaware classification are due to differences in classification definitions.

Exhibit 3 summarizes results from Exhibit 1 and shows the extreme range of prices approved in each state for types of businesses subject to each Delaware classification included in this study. For the states of Delaware and Pennsylvania (having the same classification plan for the types of businesses addressed in this comparison), these ranges are the result of differences in competitive carrier pricing programs. For the remaining states, as compared to Delaware, these extremes include the effects of both competitive pricing and classification differences, where applicable. For each grouping of classifications (Manufacturing, Contracting and Other Industries) and for all studied classifications combined, averages of the low and high rates have been computed using Delaware payrolls as weights.

The DCRB would emphasize that, while the weighting system used on Exhibit 3 provides a means of combining the various endpoints observed for approved rates falling within specified Delaware classifications in other jurisdictions, the “average” values shown would NOT represent averages for those other states themselves. This difference is attributable to the matter previously discussed regarding proper exposure weights and the fact that the DCRB does not generally have other states’ exposure data separately for the parts of classifications pertinent to this study.

INTERPRETATION OF STUDY RESULTS

To the extent that prevailing differences in rates are discovered in a study such as this one, questions often arise as to why such differences persist. The DCRB would suggest that state-to-state differences arise between workers compensation insurance rates primarily because each jurisdiction separately establishes benefits and administrative procedures pertinent to this line of business, and each state’s workers compensation system must interact with different industrial, economic and social climates. In short, workers compensation insurance costs more where losses and insurer expenses are higher, and less where losses and insurer expenses are lower. It is not generally the case that differences in insurance cost are attributable to differences in insurance carrier requirements for operating margins or profits. Further, each carrier is likely to have consistent objectives in managing and paying claims in various jurisdictions, subject to the specific constraints and requirements of each administrative system. In fact, many of the same insurance carriers actively write workers compensation business in more than one of the states subject to this study.

It is beyond the scope of this study to definitively establish and/or quantify reasons for the observed differences in workers compensation rates between the jurisdictions addressed in this study. However, the DCRB offers some general observations in order to illustrate the kinds of differences which may arise between different state workers compensation systems.

- The Delaware maximum indemnity benefit is set at two-thirds of the Statewide Average Weekly Wage (SAWW). Other states' maximum benefit may be set at another level of SAWW or a set dollar amount. In addition, the SAWW can vary widely from state to state so that states with the same benefit percentage may have significantly different benefit amounts.
- Delaware has a medical fee schedule in place. Other states may not have fee schedules in place, or such schedules applied in other states may be based on reimbursement rates that differ significantly from those in place in Delaware.
- Delaware does not specify the use of the AMA Guide to the Evaluation of Permanent Impairment in the evaluation of permanent disability. Other states may use this guide.
- Delaware does not allow offsets for unemployment benefits, Social Security old age benefits and employer funded pension benefits. Other states may allow for benefit offsets or may allow them at varying levels.
- Delaware allows an employee to have free choice of physician. Practices in this regard vary greatly by state, with some allowing employee choice of physician for the life of the claim or for a certain amount of time after the injury.
- Delaware provides no scheduled or pre-funded cost-of-living adjustment for indemnity benefits. Some states do provide such adjustments for certain types of injuries.
- In Delaware, permanent partial and temporary total disability benefits are payable for the duration of disability without limitation. Other states may have different maximum payment levels and/or duration of payments for these types of benefits.

The above observations identify provisions of the Delaware workers compensation system and offer alternative provisions that directly influence the cost of insurance in other states and any comparison to Delaware costs. The points noted may produce either lower or higher insurance costs and, therefore, lower or higher insurance rates in a jurisdiction than in Delaware. It must be recognized that many system differences (indeed a great majority of such differences which exist) are omitted entirely from these brief illustrative references. Finally, significant system differences are often manifest in controlling judicial decisions and administrative procedures.

Classification Descriptions for States Other than Delaware Used in Rate Comparison

The following listing presents brief descriptions of classification definitions from states other than Delaware used in the DCRB's rate comparison study. For detailed definitions, refer to each state's classification manual and related rules.

SECTION 1: MANUFACTURING CLASSIFICATION CODES**MARYLAND**

<u>Delaware Classification Code</u>	<u>Maryland Classification Code</u>	<u>Maryland Description of Business</u>	
104	4717	Butter Substitute Mfg.	
	4825	Flavorings, Licorice or Medicinal Extract Mfg. Rated as Drug, Medicine or Pharmaceutical Mfg.	
	6503	Potato Chip, Popcorn & Snack Chip Mfg.	
	6504	Food Sundries Mfg., NOC	
	8102	Peanut Handling Rated as Seed Merchant	
	8203	Ice Mfg. or Distribution & Drivers	
	112	2157	Bottling - All Operations & Route Supervisors, Drivers
		222	4273
	227	4431	Magnetic or Optical Recording Media Mfg.
		4452	Plastic Extruded Products Mfg., Rated as Plastics Mfg. - of Sheets, Rods, Tubes, etc.
4459		Plastics Mfg., Sheets, Rods or Tubes	
4470		Cable Mfg., Insulated Electrical	
4484		Plastics Mfg., Molded Products, NOC	
4493		Fabric Coating or Impregnating, NOC	
454		3064	Sign Mfg. - Metal or Neon - Shop Only
		3076	Sheet Metal Products Mfg. - Shop
461		3220	Can Mfg.
		3224	Enamel Ware Mfg.
		3227	Aluminum Ware Mfg.
		3315	Brass or Copper Goods Mfg.
		3400	Metal Stamped Goods, Mfg., NOC
		3803	Automobile Wheel Mfg. - Metal - Not Cast
		3807	Automobile Radiator Mfg.
	3507	Construction or Agricultural Machinery Mfg.	
	3581	Fuel Injection Device Mfg.	
	3612	Pump Mfg.	
551	3632	Machine Shop, NOC	
	3635	Gear Mfg. or Grinding	
	3826	Aircraft Engine Mfg.	
	3827	Automobile Engine Mfg.	
	1472	Distillation - Wood - and Drivers. Coke Mfg. and Drivers	
	4568	Salt, Borax or Potash Producing or Refining and Drivers	
	4670	Cottonseed Oil Mfg. - Mechanical and Drivers	
	4683	Oil Mfg. - Vegetable - NOC Butter Substitute Mfg.	
	4686	Oil Mfg. - Vegetable - Solvent Extraction Process	
	4828	Chemical Blending or Mixing NOC - All Operations and Drivers. Chemical Mixing, Blending and Repackaging Only - Not Manufacturing of Ingredients	
4829	Chemical Mfg. NOC - All Operations and Drivers - Includes Blending or Mixing. Chemical Mfg. - Including Mixing, Blending and Packaging		

SECTION 1
MARYLAND (continued)

Delaware Classification <u>Code</u>	Maryland Classification <u>Code</u>	Maryland Description of <u>Business</u>
581	2305	Textile Mfg. - Synthetic
	4459	Plastic Materials Mfg. - Rated as Plastics Mfg., Sheets, Rods or Tubes
	4740	Oil Refining, Petroleum
	4741	Asphalt or Tar Distilling or Refining
	4751	Synthetic Rubber Mfg.
757	7600	Telecommunications Co. - Cable TV or Satellite - All Other Employees and Drivers
	8901	Television Community Coaxial Cable Company Contractor: Studio or Exchange Employees and Clerical. Telecommunications Co. - Office or Exchange Employees and Clerical
759	6325	Conduit Construction - For Cables or Wires - & Drivers
	7600	Telephone or Telegraph Co.: All Other Employees & Drivers

NEW JERSEY

Delaware Classification <u>Code</u>	New Jersey Classification <u>Code</u>	New Jersey Description of <u>Business</u>	
104	2150	Ice Mfg.	
	4627	Extract Mfg. - Dyewood Licorice or Tanning	
	4628	Extract Mfg. - Perfumery, medicinal or flavoring	
	6504	Food Sundries Mfg., NOC	
	8102	Peanut Handling Rated as Seed Merchant	
	8203	Ice Mfg. or Distribution & Drivers	
112	2157	Bottling NOC & Route Supervisors, Drivers	
222	4239	Paper Mfg.	
	4431	Magnetic or Optical Recording Media Mfg.	
	4452	Plastics Mfg: Fabricated Products NOC	
	4459	Plastics Mfg., Sheets, Rods or Tubes	
	4470	Cable Mfg., Insulated Electrical	
	4484	Plastics Mfg., Molded Products, NOC	
	4491	Linoleum Mfg. - Burlap or Felt Base	
227	4493	Fabric Coating or Impregnating, NOC	
	3045	Steel Barrel or Drum Mfg.	
454	3066	Sheet Metal Work - Shop	
	3075	Coppersmith - Shop	
	3076	Fireproof Equipment Mfg.	
	3220	Can Mfg.	
	3227	Aluminum Ware Mfg.	
	3315	Brass or Copper Goods Mfg.	
	3400	Metal Goods Mfg., NOC, also Metal Stamping - Shop	
	3807	Automobile Radiator Mfg.	
	461	3507	Construction or Agricultural Machinery Mfg.
		3581	Fuel Injection Device Mfg.
3612		Pump Mfg. - Includes Engine Mfg., NOC	
3632		Machine Shop, NOC - Includes Confection Machine Mfg.	
3635		Gear Mfg. or Grinding	
	3826	Aircraft Engine Mfg.	

SECTION 1
NEW JERSEY (continued)

<u>Delaware Classification Code</u>	<u>New Jersey Classification Code</u>	<u>New Jersey Description of Business</u>
551	4627	Extract Mfg. - Dyewood, Licorice Or Tanning
	4683	Oil Mfg. - Vegetable - NOC
	4827	Dye Or Dye Intermediate Mfg. NOC
	4828	Chemical Blending or Mixing NOC - All Operations & Drivers
	4829	Chemical Mfg. NOC - All Operations and Drivers - Includes Blending or Mixing. Chemical Mfg. - Including Mixing, Blending and Packaging
581	4459	Plastics Mfg. - Sheets, Rods, Tubes
	4712	Grease or Oil Mixing or Blending
	4740	Oil Refining - Petroleum & Drivers
	4741	Asphalt or Tar Distilling or Refining & Drivers
757	7600	Telephone Or Telegraph Co. & Drivers
	8901	Telephone Or Telegraph Co. - Office Or Exchange Employees & Clerical
759	6325	Conduit Construction - For Cables or Wires - & Drivers
	7600	Telephone or Telegraph Co. & Drivers
	7601	Telephone, Telegraph or Fire Alarm Line Construction & Drivers

PENNSYLVANIA

As of January 1, 2018, each of the Delaware manufacturing classifications studied correspond to or fall entirely within the same numerical classification in Pennsylvania.

VIRGINIA

<u>Delaware Classification Code</u>	<u>Virginia Classification Code</u>	<u>Virginia Description of Business</u>	
104	4717	Butter Substitute Mfg.	
	4825	Extract Mfg. (Flavoring, Licorice, Perfumery or Medicinal) Rated as Drug, Medicine or Pharmaceutical Mfg.	
	6503	Potato Chip, Popcorn & Snack Chip Mfg.	
	6504	Food Sundries Mfg.	
	8102	Seed Merchant	
	8203	Ice Mfg. or Distribution & Drivers	
	112	2157	Bottling - All Operations & Route Supervisors, Drivers
	222	4273	Bag Mfg. - Paper or Plastic
		4431	Phonograph Mfg.
		4452	Plastic Extruded Products Mfg., Rated as Plastics - Mfg. of Sheets, Rods, Tubes, etc.
	4459	Plastics Mfg., Sheets, Rods or Tubes	
	4470	Cable Mfg., Insulated Electrical	
	4484	Plastics Mfg., Molded Products, NOC	
227	4493	Fabric Coating or Impregnating, NOC	
454	3064	Sign Mfg. - Metal or Neon - Shop Only	
	3076	Fireproof Equipment Mfg.	
	3220	Can Mfg.	
	3224	Enamel Ware Mfg.	
	3227	Aluminum Ware Mfg.	
	3315	Brass or Copper Goods Mfg.	
	3400	Metal Stamped Goods, Mfg., NOC	
	3803	Automobile Wheel Mfg. - Metal - Not Cast	
	3807	Automobile Radiator Mfg.
